Who we are

Majority owned by the NHS, but with the commercial freedom to invest in innovation, Viapath are on a mission to transform pathology services in the UK. We provide pathology services to the NHS, private hospitals and other organisations both across the country and internationally.

What we do

All our laboratories are either accredited or working towards accreditation by UKAS to ISO15189. To view our laboratory accreditation status please follow this link: http://www.viapath.co.uk/about-viapath/quality-and-governance/accreditations

TEST OVERVIEW

Description
Aciclovir and ganciclovir levels are common virology request for TDM. These samples are sent to Bristol. Aciclovir TDM indications: Requesters have found these assays to be of value in patients with renal failure and/or on ECMO, in cases of suspected neurotoxicity, or suspected poor absorption and in some patients receiving valaciclovir. Ganciclovir TDM indications: Indications Requesters have found these assays to be of value in patients with renal failure and to monitor oral absorption, particularly in patients receiving valganciclovir.

Clinical details
Please specify which of these levels are required

ORDERING INFORMATION

Sample type and Volume required
Sample required Approx. 1-2 mL of separated serum (if sample size is a problem the minimum acceptable is 100 µL).

Turnaround time
2 days
